

Notice to Mariners – Current Meter Surveys

As part of the Anglian Water Coastal Modelling System Upgrade, Intertek has subcontracted Partrac Ltd to undertake a current meter survey in the Blackwater estuary, from a moored vessel. This is to be completed over two days on both a Neap and Spring tide.

The work will require the vessel to remain on station for a total period of 13 hours. Equipment is to be lowered every 30 minutes for the duration of the survey.

The Neap tide survey is to be completed on the 24th September and the Spring tide survey on the 30th September.

This survey position is:-

Easting	Northing	Lat	Long	Lat	Long
593697	206389	51.723° N	0.803 ° E	51° 43.365' N	000° 48.179' E

Positions are in WGS84.

The survey is to be completed on board the 'Predator', owned and operated by Predator Charters Marine Ltd.

Avoidance to a range of 50m of any operations is requested.
