

# NOTICE TO MARINERS

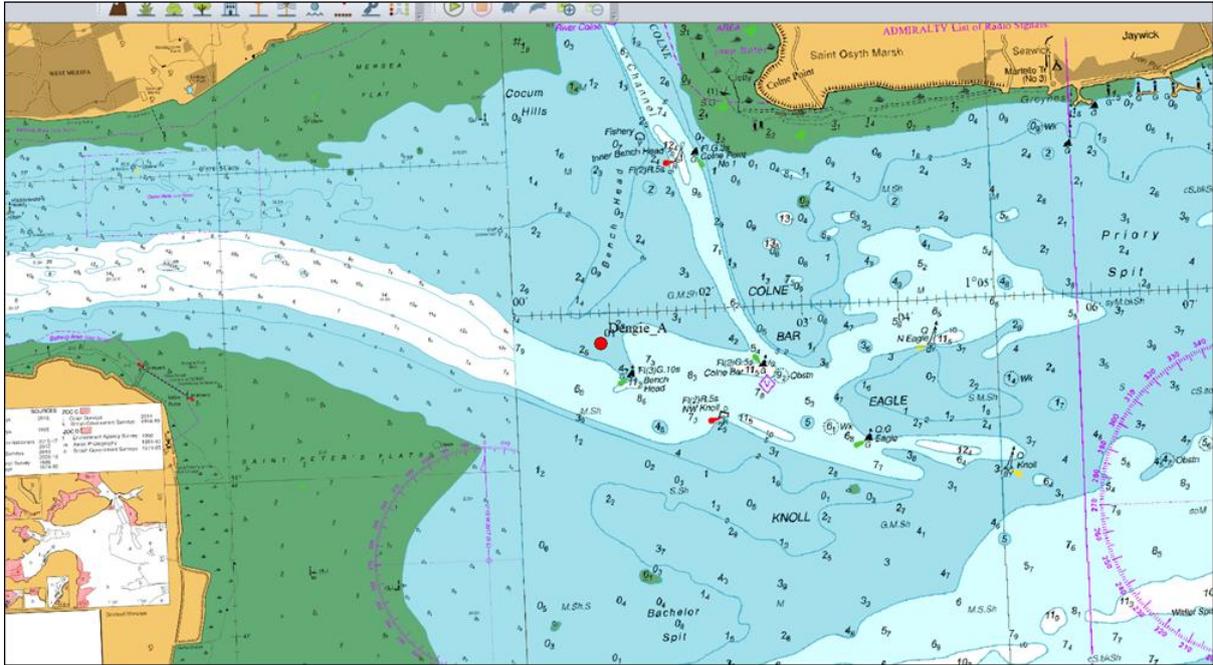

ABPmer will be undertaking a metocean deployment during March 2026. This is located East of the approaches to the River Blackwater. Deployment of the equipment will commence on 04 March 2026 and will be in place for a period of around 30 days before being recovered.

Equipment will consist of a seabed frame with an associated sinker weight & special yellow surface marker buoy (see below diagram of mooring layout and equipment). The surface marker buoy will be lit to a flash sequence of Fl(5).Y.20s.

The approximate location for the mooring is as follows :

Name	OSGB Easting	OSGB36 Northing	ETRS89 Latitude	ETRS89 Longitude	Water Depth (mCD)
Dengie_A	608229	209633	51° 44.80158' N	1° 0.90258' E	2.6

Deployment of equipment will be conducted from the Haven Hornbill, vessel MMSI 235005298

Vessel will be displaying R.A.M during operations, with passing vessels requested to pass with appropriate distance and reduced speed/wash.

Further details can be obtained from the following contact:
